

The mission of **Delray Lighting** has always been to create energy efficient, environmentally responsible lighting fixtures, while providing style for today's dynamic interior designs.

Energy efficient lamps and ballasts:

Compact Fluorescent, Ceramic Metal Halide, T5/T5HO, and LED light sources in efficient luminaires, combined with the best power factor ballasts for standard and dimming, ensure the lowest wattage per square foot.

Controls:

All Delray products are offered with multiple dimming ballast options to accommodate simple scene control or energy management strategies, like daylight harvesting, programmable/addressable switching, or step dimming.

Recycled content:

Delray uses postindustrial and consumer recycled content in raw materials whenever possible.

Clean manufacturing process:

Delray complies with the highest State of California fabrication process standards for air and water quality management. Our manufacturing facility exceeds Title 24 building codes.

Short supply line:

All of our products are manufactured in California, shortening supply line distances.
