SR–Separate Mount, Remote Driver
### *Installation ou de montage*

WARNING: disconnect main power at the source prior to installation! *Only qualified electricians should install Delray Lighting products.*

Gripper base threads onto 1/4-20 stud.

Gripper base

Alternately, the gripper base may be mounted with #8 flat head wood screw.

Feed aircraft cable through gripper and side exit hole in gripper base.
Screw gripper into base.

Gripper

Depress gripper nozzle to release/adjust cable.

Mount J-box at center of one mount point.
(J-box by others)

NOTE: Max. canopy to fixture distance: 25 feet
Max. canopy to driver distance: 100 feet (with 10 AWG wire).

Attach backplate to 3 in. mud ring (by others).

Make connections in J-box to remote driver.

NOTE: Connection of lamp cord directly to line voltage voids warranty.

Attach canopy to backplate with AC cable gripper base.

Insert 1/16" aircraft cable into gripper, depress nozzle tip to adjust. Re-insert gripper into base. Leave at least 1" of exposed cable.

Feed lamp cord through threaded nipple and backplate.
Use O-rings provided to tether lamp cord along aircraft cable.

Three mounting points, equally spaced:
UC2 –24" dia. @ 20.785" spacing
UC3 –34" dia. @ 29.45 spacing
UC4 –44" dia. @ 38.1" spacing
UC5 –64" dia. @ 55.426" spacing
UC6 –79" dia. @ 68.42" spacing

Uno wiring:
Red to DC positive
Blue to DC negative

Dos wiring:
Red to DC positive
Blue to DC negative — Driver 1– uplight
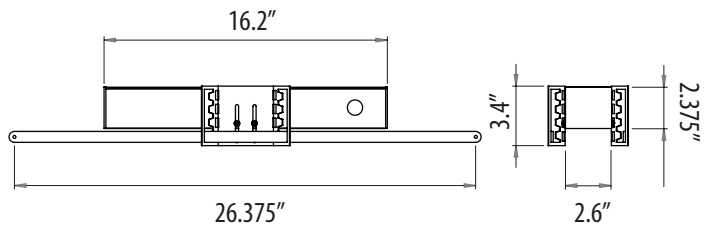

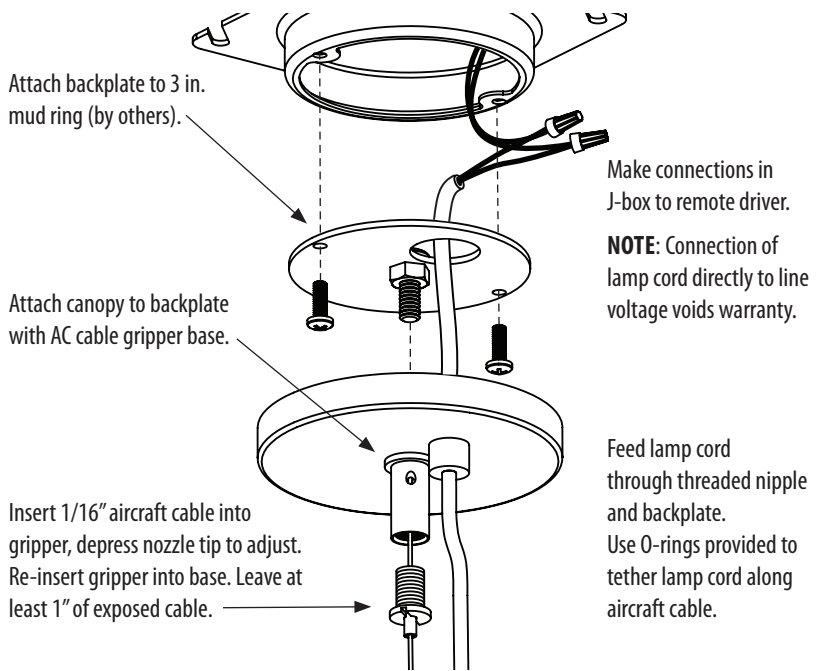

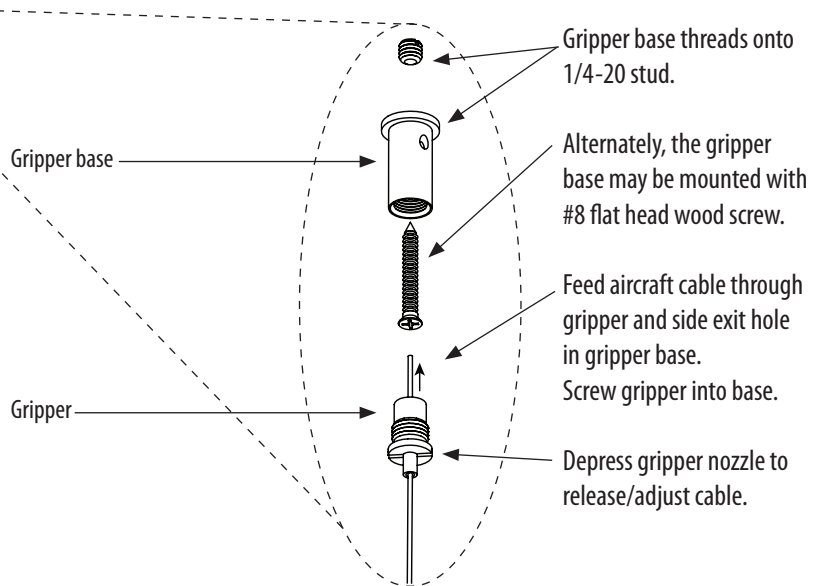

Red/White to DC positive
Blue/White to DC negative — Driver 2– downlight

Dimming:
Purple and Gray wires from driver to 0-10V dimmer, cap if not used.

16.2"

3.4"

2.375"

26.375"

2.6"

Remote driver includes bar hangers to mount above suspended ceilings. Drivers must remain accessible after installation. Driver housing must not be mounted any closer than 4 inches apart. Bar hangers and brackets may be removed for direct mount to structure with screws. Connect J-box to driver housing with conduit (by others).

delray.
