

LUMALED

# LUMA LED

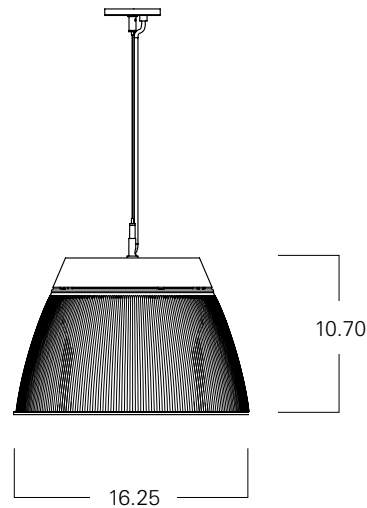

LUMA is an industrial style pendant with four diffuser options. Clear and opal prismatic refractors provide general illumination, while white and gold metal reflectors create a high/low bay downlight. The low profile, die cast convection-vented heat sink is less obtrusive than other industrial fixtures; a more elegant choice for museum, retail, loft or creative studio interiors.

Standard dimming is 0–10V, 1%. Standard lumen outputs are 5,000, 10,000, or 15,000; or order option XL for factory-set custom lumen output. cUL listed for dry locations.

**IL793** – metal reflector

**IL791/C** – clear prismatic refractor  
**IL791/O** – opal prismatic refractor
